

Embra Tablet Mechanism Installation

Tools Required

- 5/32" Hex Drive and 4 to 6 inch Extension

Hardware Required

- Tablet Mechanism Assembly
- Socket Head Cap Machine Screws #10-32 X 5/8"

Installation:

- Unbox the Tablet Mechanism Assembly, or Assemblies, and locate the hardware bag(s)
- Tablets are handed and should be kept with the lounge unit it shipped with.

To Install the Tablet Mechanism:

1. Lounge units should be completely assembled and installed prior to attaching the Tablet Assembly.
2. Locate four (4) threaded inserts on the front of the Arm. Arm should have cutouts where the inserts are located. A driver may be needed to expose the inserts through the holes.
3. Verify the Tablet Assembly matches the arm mounting location. Tablet assemblies are handed and should face inward on the lounge.
4. Align the Tablet Mechanism and install with four (4) Socket Head Cap Machine Screws. A right-handed Tablet Assembly attaching to a right arm is shown in Figure A.
Note: Tablet rotates outward 90 degrees from seated position.
